

## Perutnina Ptuj: S&T Slovenia to implement SAP

### The customer

South-eastern Europe's biggest food processing company Perutnina Ptuj assigned S&T Slovenia with the implementation of a SAP Business Information System. The SAP solution enables Perutnina Ptuj to unify key business processes, access the extensive knowledge base in the food industry and use a uniform information system regardless of the country or activity. The project includes the entire Perutnina Ptuj Group, which is composed of companies in Slovenia, Croatia, Serbia, Bosnia and Herzegovina, and Romania.

### The challenge

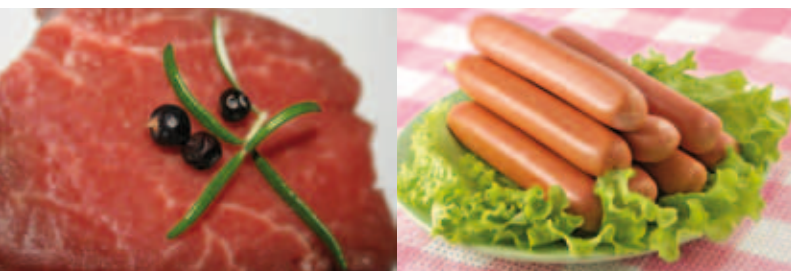

The expansion of its operations into the markets of former Yugoslavia, and plans for further expansion into the markets of south-eastern Europe, have brought about the need for Perutnina Ptuj to consolidate its operations and unify its processes within the entire Group. The Group consists of a number of companies performing various activities. So far, the information support infrastructure at Perutnina Ptuj comprised a combination of solutions of the individual companies which were not always interconnected.

Thus, for its main activities, Perutnina Ptuj required a specialized solution compatible with its industrial needs. This was provided by the SAP ERP, together with the integrated myMEAT industry solution for the meat processing activities of the Swiss company Softproviding. S&T Slovenia was responsible for the implementation of the whole system, the purchase of licenses and also maintenance.

The implementation of the SAP information system provides Perutnina Ptuj with a fully customized solution which enables the standardization of processes and allows measurements and comparisons of operations using uniform criteria for all the Group's companies, as well as ensuring that reliable and credible data is obtained. The solution being implemented for Perutnina Ptuj by S&T Slovenia is especially customized for the meat processing industry.

### Benefit to the customer

- customized solution
- unified key business processes
- uniformed information system

### S&T Slovenia

S&T Slovenia is the leading Slovenian system integrator. S&T Slovenia employs 371 employees, who, in cooperation with the leading global IT providers, ensure the quality of services and customer satisfaction. In 1995, S&T Slovenia was the first IT company in Slovenia to obtain the ISO 9001 Quality Management Standard certificate.

S&T provides a wide range of services, such as consulting, education, software development, IT solution implementation and maintenance. Its customers include the largest European telecommunication, banking and energy institutions, as well as government and healthcare organizations.

S&T Slovenia is a part of the S&T Group, which, with around 3,100 employees in 22 countries and annual sales in 2007 of 522,2 million Euro, is the leading provider of IT consultancy, solutions and services for customers in Central and Eastern Europe, in the Germany-Austria-Switzerland (DACH) region and in China and Japan.
