

DLS Srbija: IT infrastructure enhancement

The customer

DLS Srbija belongs to the national lottery in Serbia and with more than 1,000 outlets serves some 200,000 players per week who try their luck in the lottery.

The challenge

For the innovative project DLS Srbija had two important demands: To increase the speed with which processes are handled and to enable the company to implement new applications more quickly than in the past. In addition a more powerful storage system should be installed and the new system also has to support the complete range of business processes from all outlets. DLS Srbija required this greater capacity in order to expand its product portfolio and thus increase the number of its customers.

The project

The solution provided by S&T Serbia is based upon the installation of a new storage and backup system which guarantees the availability and backup of data. This system was first of all configured precisely in accordance with the company's requirements. In a second step, the data was migrated from the old storage system. A 13.5 terabyte storage system now ensures that DLS Srbija's data is secure and can be used simultaneously

and at high speed. Furthermore, the scalability of the infrastructure guarantees the rapid implementation of new applications without compromising the efficiency of existing systems.

S&T successfully implemented the solution within just one month. All systems remained fully functional during the entire conversion and implementation phase.

Benefit to the customer

- modern, flexible and powerful IT infrastructure
- scalable system
- higher capacity
- accelerated business processes
- high availability and backup of data based on a modern storage and backup system

„High-performance IT systems which can be flexibly expanded are vital for our business if we are to meet customer requirements quickly and efficiently in future. S&T impressed us with the quality of its services and the professionalism with which the project was completed on schedule.“

Stanimir Miljković, CIO, DLS Srbija

S&T Serbia

S&T Serbia is one of the Top 3 IT systems integrators in the country, and is the first international IT company established with 100% foreign capital. S&T Serbia was founded in 1996 (as S&T Yugoslavia) as a part of S&T AG, whose central office is in Vienna. With approximately 100 employees in subsidiaries in Belgrade and Novi Sad S&T Serbia focuses on large and mid-sized, national and multinational companies in projects spanning the complete range of IT services: consulting, designing, implementation, integration, maintenance and permanent (24/7) customer support. S&T Serbia's success is based on a one decade experience and continuous development since its inception.

S&T Serbia belongs to the S&T Group, which, with more than 3,100 employees in 22 countries and annual sales in 2007 of 522,2 million Euro, is the leading provider of IT consultancy, solutions and services for customers in Central and Eastern Europe, in the Germany-Austria-Switzerland (DACH) region and in China and Japan.
