

Soyaprotein: S&T Serbia implements INFOR BaanERP business solution

The customer

Sojaprotein AD ranks amongst the most significant soya bean processing plants in South East Europe and is the only company of its kind in Serbia. Founded in 1978, the company began regular production in 1982. To-date, Sojaprotein AD has around 400 employees, and the company's processing capacity is 900 tons of soya beans daily or 300,000 tons annually.

The challenge

Soyaprotein decided to implement Infor BaanERP, to extend the business scope as well as the expansion into new markets in the future. The ERP project, which ranks amongst the most complex in Serbia, was implemented over a period of almost three years in total with significant challenges for the S&T team.

The project

Numerous business functionalities are covered by this project, such as production process planning and production itself, quality control of incoming goods, purchasing, sales, storage, external trade business, wages calculations and employee tracking. S&T also has developed a completely new module to manage the payment of raw materials to contract farmers and has integrated it in the standard INFOR BaanERP solution. Comprehensive organisational changes to reduce the company's operating costs which arose during the implementation also meant that the solution had to be modified. With the new Infor BaanERP business solution Soyaprotein has now a modern IT-system, which enables the company to track key business performance indicators and to make decisions in good time.

Benefit to the customer

- state-of-the-art IT system
- flexibility and efficiency of ERP system
- extend business scope
- expand into new markets

„We are confident that we have adopted with Infor BaanERP business solution a modern IT system which will help extend our business scope as well as our expansion into new markets in the future.“

Branislava Pavlovic, Managing Director, Sojaprotein AD

Veroslav Jankovic, Investment Director, Victoria Group

Nikola Vuckovic, Internal project Director and Sojaprotein AD's Manager of Planning, Preparation and Development of the Production Sector

S&T Serbia

S&T Serbia is one of the Top 3 IT systems integrators in the country, and is the first international IT company established with 100% foreign capital. S&T Serbia was founded in 1996 (as S&T Yugoslavia) as a part of S&T AG, whose central office is in Vienna. With approximately 100 employees in subsidiaries in Belgrade and Novi Sad S&T Serbia focuses on large and mid-sized, national and multinational companies in projects spanning the complete range of IT services: consulting, designing, implementation, integration, maintenance and permanent (24/7) customer support. S&T Serbia's success is based on a one decade experience and continuous development since its inception.

S&T Serbia belongs to the S&T Group, which, with more than 3,100 employees in 22 countries and annual sales in 2007 of 522,2 million Euro, is the leading provider of IT consultancy, solutions and services for customers in Central and Eastern Europe, in the Germany-Austria-Switzerland (DACH) region and in China and Japan.
